A DELICATE OPERATION IN ENGINEERING.—
One of the most delicate manipulations in engineering, says the New York Tribine, is about to be performed in connection with the lowering of the west supply pipe of the Croton Aqueduct, which runs through Eighth avenue. This pipe is 30 inches in diameter. It is to be lowered to a depth of ten feet below its present position, without the water being stopped. In the upper part of the avenue, the work has already commenced. The earth is being excavated from over and under the pipe, and props site to be instruduced until the whole excavation of 1½ miles shall have been completed. Then it will be lowered to its bed gaadually, so as to prevent the curve at any part of the pipe from breaking. It appears that the water cannot be shut off from the pipe, owing to the fact that a large portion of the western district of the city is dependent on it for supply. If the pipe should break in the course of the operation, the dissester would be terrible in its effects upon the adjacent property, while the supply would be cut off most effectually. A DELICATE OPERATION IN ENGINEERING.

A Ratiway Last Extinguished by a Figgor.—A curious circumstance occurred on a Central Raliroad freight train. The train was drawn by the locomotive "Ledyard," W. W. Rogera, engineer. About four miles west of Batavia, while the train was running at good speed, suddenly a crush occurred forward, and the head light was extinguished. After the first surprise subsided, Mr. R. directed his fireman to go and relight the lamp, but subsequently concluded to wait till he arrived at Aldert, for fear an accident might occur to the man. On reaching the latter place, a wild bigeon was found inside the lantern, dying. It had a broken wing, and was otherwise injured. The glass in front three-sixteenths of an inch in thickness, had a hole broken through it just large enough to allow the bird to enter, and the appear-A RAILWAY LAMP EXTINGUISHED BY A to allow the bird to enter, and the appearance of the aperture was similar to that usually made when a rife ball is shot through glass. It is supposed that the train encountered a flock of pigeons, and that one of them, dazzled by the powerful light of the head lamp, dashed at it, and was caught as above rejusted.

Berring and Betters on the Great Pairs Figure in New York.—The New York Commercial Advertiser says probably several hundred thousand dollars were wagered on the prize fight. The principal backer of Heenan is Dan Bryant, of minstrel notoriety, who is said to have wagered all his money on Heenan, and through his advice much more had been invested. Added to the wagers in large amounts made by "heavy sporting men" may mounts made by "heavy sporting men" may e estimated a very large amount by other arties, in small sums, so that in the agge-ate, the bets may be said to reach almost

MINIATURES OF THE PRETENDERS .- Mr. J MINIATURES OF THE PRETENDERS.—Mr. J. W. Wall. of Burlington, New Jersey, has in his possession miniatures of the Pretenders, printed on ivory. They are life portraits of the ill-fated Chevalier and his son, the Prince Chartie of the Scottish ballads, and are supposed to have been presented by a young Prince to some of his adherents in Scotland, as they answer to the descriptions of those he had painted in France, and circulated among his chief supporters.

FIGHT BETWEEN AN EAGLE AND A BULL Doc.—Quite a desperate fight took place in Cornwall County lately, between a bull dog and an eagle. Hearing the noise, the owner of the dog ran to his assistance, when the eagle turned upon his new adversary, but after a short fight was overcome and des-patched. He measured nine feet from wing to wing.

THE EFFECT OF THE COMMERCIAL TREATY THE EFFECT OF THE COMMERCIAL TREATY ON FRANCE.—"Since the conclusion of the treaty of commerce with England," says the Journal du Haure, "agents of London firms have been visiting our vineyards to purchase wines and brandies. In Province and Languedoc alone, purchases have already exceeded the sum of 20,000,000f., and at Cognac 15,000 hectolitres of brandy have been bought."

CULTURE OF THE VINE IN THE SOUTH.—A convention of vine growers has been called by the vine-growing and agricultural associations in the South. Associations for the culture of the vine, and also for making wine, are being formed in many parts of the country. It is only necessary to increase the knowledge of the subject to a degree equal to the zeal in which it is taken up to insure success.

Riorous Electrons in Canada.—A committee of the Canadian Parliament have declared the election in Quebec void, on account of violence and illegal voting, and propose to declare the city distranchised for the remainder of the session as a punishment for tolerating such abuses. nting such abuses.

A Suspected Mundessea.—A man named Geo. Shankland, of New York, who has been disposing of the effects of a dead man rather clandestinely, has been arrested upon suspicion of murdering the deceased, who, until then, it was supposed had died a natural death.

DEATH OF A WELL-KNOWN LAWYER.—Hon. Edgar C. Wilson, a distinguished lawyer in North-western Virginia, and at one time a representative in Congress from Wheeling District, died last week in Morgantown. Mr. W. was a brother to Rev. Norval Wilson, of the M. E. Church.

Hernar-Workship.—The prowess of John C. Heenan in his contest with Tom Sayers has been halled by the oystermen of Philadelphia with every demonstration of delight. On Monday they gayly dressed all their craft at Spruce-street wharf in colors, ensigns, and other decorations significant of victory.

FOREIGN TRAVEL.—During the three years of Mr. Buchanan's administration, the Department of State has issued about eighteen thousand passports to citizens desiring to travel in foreign countries. The tide of travel has just commenced for the season.

THENESSEE TAX ON AMUSERENTS.—Theaters are taxed in Nashville \$250 a year; concerts and shows by traveling minstrel companies \$7 50 for each exhibition; circuses \$75 and menageries \$50 for each exhibition.

Postrativos Grosos Prancos.—The friends of George Peabody in Baltimare have made a contribution for the purpose of procuring a full length portrait of him. The painter and poet, T. Buchanan Read, has been employed to proceed to hondon for this purpose.

THE JAPANESE AND CHINOLINE.—It is related that the Japanese thought the ladies whom they saw at the Sandwich Islands wearing crinoline, actually filled the immense skirts. They reared on finding out the mistake.

A Woman Accumptably Poisoned—Mrs.
Peyser died in New York, aday or two since, from the effects of arsenic which, having been left carelessly about the house to kill rate, had gotten into her feed and caused her changed, we quote prime Northern at \$1.40 (2) is per barrel, and common at \$5. (24).

Friday evening's Journal of Commerce thus refers to financial affairs:

The market is without further change in rates of interest. Some of the bankers will lend money at set's per cent from day to day, and there are also instances where acceptances of well-known bankers, at short dates, have been taken as low as 5 per cent, but the general tone of the market is undentitedly framer than it was a week or two since, and our quotations fairly represent the current rates. The money market in its main features shows no naterial change. The supply on call is very free a material change. The supply on call is very free at 5 per cent.
Good paper is scarce at tow rates. Even long bills do not accumulate to any extent, the demand from Eastern Bankers who have large balances over absorbing much of the floating supply. Short bills are 585% per cent., and those running four and six months, 55660 per cent.
The foreign Exchange market presents no new feature. There is a moderate demand for bills on London at 100/5601098. France are 5.13660.125 for select bills.
The steamers for Europe to-morrow will take about one million deliars, though, in the absence of the Canade's letters, which are to arrive at five P. M., this is altogether conjectural.

COMMERCIAL AFFAIRS.

Monetary market left off close tast week, with a demand rather in excess of the disposition to accommodate, but without stringency, good paper still going, in the regular quarters, at the established rates of 100/12 per cent. The demand for Currency was large during the week, and the stock hold in Third-street considerably reduced. This week the calls will be on a smaller exale, and the receipts increased, so that we may reasonably look for augmented case in the market.

Rantern Exchange, extremely firm and scarce at the beginning, grew heavy as the week advanced, and on Saturday rates were barely sustained. To-day or to-morrow, it is thought, the rate will drop down to ½ once more, and there remain during the month. New Orleans Exchange will probably be quiet, ar 4 Gold dull this week, as we see no reason why they should be fur request.
